_FRAMELESS GLASS ENCLOSURES

The 3,000ft² space was designed for a boutique creative agency located in the Meat Packing District of NYC. Existing cubicle walls that cut up the space and sheltered natural light were demolished to give way to an open plan with a loft feel. Simple, frameless glass volume enclosures were used for staff offices to allow daylight to permeate the space along with the whitewashed floor to maximise brightness. Custom stainless steel framed desks were built along with a custom designed high gloss lacquered reception desk. The clean-lined forms and modern material palette reinforce the company's minimalist aesthetic approach.
